

Closing the Gap

Sandbach High School and Sixth Form College – September 2016

Updated October 2016

1. Background

The Pupil Premium is a government initiative designed to target resources on those students deemed to be from a disadvantaged background so as to close the gap with their peers and supporting children and young people with parents in the regular armed forces.

Specifically the Pupil Premium is provided for those students who have been on Free School Meals (FSM) at any point over the past 6 years (Ever6) or those children who have been looked after continuously for at least 6 months (CLA). Currently the Pupil Premium FSM and Ever6 value is £935 per eligible student and this is expected to rise each year. The children adopted from care or who have left care under a special guardianship or residence order their funding is £1,900 which is administered by the designated Virtual School Head. We receive £900 and the Virtual school administrator receives the other £1,000. There is also a small provision made up for those students who have a parent in the armed services. Neither the government nor any government agencies have dictated how the Pupil Premium money should be spent, but what is clear is that the money should be used to promote strategies which close the attainment gap between the highest and lowest achieving students.

Results for summer 2016 show the attainment of Pupil Premium students in maths in the A* - G benchmark has significantly improved with the 100% achieving a pass. It is pleasing to see that as a school we continue to close the 'within school gap' with the 3 levels of progress indicator in English significantly improving for Pupil Premium students. In the various categories we have sample sizes that are relatively small but, as an example, for students in receipt of FSM they made significant progress in Key Stage 4 Capped Point and Total Point Scores from 2015.

Results for summer 2015 taken from RAISEonline show the attainment of Pupil Premium students in maths in the 5 A* - C benchmark has significantly improved with the gap closing. It is pleasing to see that as a school we have continue to close the 'within school gap'. In the various categories we have sample sizes that are relatively small but, as an example, for students in receipt of FSM they made significant progress in Key Stage 4 Capped Point and Total Point Scores. In the 5 A* - G data we have closed the gap from 2014.

Results for summer 2014 taken from RAISEonline show a significant improvement in the attainment of Pupil Premium students in English and maths in the 5 A* - C benchmark. It is also pleasing to see that as a school we are closing the gap in both subjects, but significantly in maths in terms of the number of students who have achieve 5 A* - C. In the various

categories we have sample sizes that are relatively small but, as an example, for students in receipt of FSM they made significant progress in both English and maths against the KS2 and KS4 progress indicators – refer to the pages showing the improvement initiatives we funded from Pupil Premium during this year to raise attainment and standards across the school.

The 2013 validated RAISEonline results highlighted that our Pupil Premium pupils are achieving significantly above national average in the following areas: Capped total points scored (with equivalents and GCSE only); total points score (with equivalents and GCSE only); Key Stage 2 to 4 Value Added and overall value added, % making at least expected progress in English. The progress for Pupil Premium pupils in maths was not as positive and for this reason we focussed our attention for the 2012/13 academic year on maths – refer to the pages showing the improvement initiatives we funded from Pupil Premium during this year to raise attainment and standards across the school.

Strategies for Closing the Gap – a brief overview

Sandbach High School and Sixth Form College is a comprehensive school with approximately 13% of students eligible for Pupil Premium funding. 13% of our Pupil Premium students have a Special Educational Need (SEN), as compared to 8% of non-Pupil Premium students. No single intervention provides a complete solution to the complex educational issues in any school and it is therefore a multi-faceted approach that we feel offers the best opportunity for students to succeed. The key to closing the gap between the highest and lowest achieving students is careful and thorough monitoring/tracking of student attainment and progress. At Sandbach High School and Sixth Form College this is done via Curriculum Leaders, Achievement Co-ordinators and the SENCo who all regularly monitor progress and attainment through regular data collections covering both academic achievement, attendance checks and monitoring Behaviour for Learning grades. This tracking then informs interventions.

Interventions come in a variety of forms but must be specific to the needs of the student/group of students and not simply generic strategies. Examples of such strategies at Sandbach High School and Sixth Form College include the creation of an extra maths class in Year 10 and 11 to give smaller class sizes for those students in need of close monitoring/intervention; the creation of Year 11 maths intervention to offer additional support in maths through withdrawal from other lessons where examinations are not being completed; 121 tuition sessions particularly in maths and English to focus support where needed and small group work for targeted students after school. We also introduced the Accelerated Maths programme in 2012/13 across each Key Stage and this is having a very positive impact on attainment and progress. We have also introduced in 2014/15 the Read, Write, Gold programme which aims to make access arrangement easier for students to work with and use productively. We also know that for students to succeed attendance is critical.

Improving and maintaining attendance has been a fundamental part of improving standards at Sandbach High School and Sixth Form College.

10. Summary

All of the results and information above demonstrate that currently Pupil Premium students at Sandbach High School and Sixth Form College are achieving results in line with non-Pupil Premium students nationally. Equally, they show that within school the gaps between Pupil Premium and non-Pupil Premium are closing in maths and we are actively working to do the same within English. It is pleasing to note that the students are making excellent progress but we are far from complacent and continue to work hard to narrow attainment and progress gaps further and ensure that every young person at Sandbach High School and Sixth Form College achieves their full potential.

If you have any further questions regarding Pupil Premium at Sandbach High School and Sixth Form College please feel free to contact us and we will try to provide the information you require.
